Representative(s) of stakeholder(s)	AFCAR: [REDACTED] [REDACTED] [REDACTED]; ACEA: [REDACTED] [REDACTED] CLEPA: [REDACTED] HERE: [REDACTED] TOMTOM: [REDACTED] [REDACTED] [REDACTED]
DG GROW representatives	[REDACTED], [REDACTED]
Representatives of other DGs	[REDACTED] (MOVE) +1, [REDACTED] (CONNECT) +1

Summary of meeting

The use case presentation are a voluntary initiative from the parties – EC role is of an observant. It will feed on the Motor Vehicle Working Group work on access to data.

Use Cases:

Out of scope of the request

Out of scope of the request

- **3: Electric Vehicles Charging**

TOMTOM and HERE presented their results on the use case – which is based on a commercial product (giving prediction of the autonomy of the EV to find the next charging station) and a hyper-network developed in H2020 (project NeMo) where real data from the car and the charging station are made available. The quality/quantity of data obtained from the car seems to have been enough to design a working use case.
