Subject: Electricity Market Design - Enel Proposal

INTERNAL

Caro Stefano,

We have a comprehensive proposal that would allow to **maintain the foundations of the market**, with the main elements that have proven to be effective, but also to **achieve a de facto decoupling to avoid contagion from gas to electricity generated at low prices by renewable energies**. The ultimate goal is to **protect European citizens** from excessive prices.

I very much appreciate the openness that you have always shown to discuss the reality of the energy sector. I look forward to your feedback.

Best regards,

[REDACTED]
