Dear [REDACTED],

On behalf of Executive Vice-President Frans Timmermans I would like to thank you for your kind invitation. Unfortunately, due to a very busy schedule in the coming months, it is impossible for Mr. Timmermans to respond positively to your request.

However I could offer you a web meeting with Cabinet Members on the first week of September:

- 1 September at 15:00
- 2 September at 11:00.

Please inform me if this is suitable for you.

Best regards,

[REDACTED]
Assistant:

European Commission
Cabinet of the Executive Vice-President Frans Timmermans

Subject: FW: Renewable and decarbonised gases, sector coupling, innovative heating technologies to decarbonise buildings

Dear Mr Samsom,
Dear Mr Maggi,

I follow up on the attached letter of 18 June which we sent to Executive Vice

President Timmermans, to propose a meeting on behalf of the associations who signed the letter.

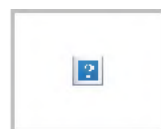

This group of associations represent the entire supply chain of energy supply, transmission and distribution; manufacturing of heating appliances and installers of appliances. We work to realise the integration of the energy system from supply to end-users, and have been very active in the innovation linked to renewable and decarbonized gases and technologies working with them.

We would very much like to present our approach, our views and our innovation to you, as we believe this is relevant to realise a smart sector integration, a successful Renovation Wave and Hydrogen strategy. Equally, we would like to hear from you how we can be of assistance, as you develop your considerations on the abovementioned policies.

Thank you in advance for your availability and please feel free to contact me to schedule a joint meeting.

Writing on behalf of:

CEDEC (Confederation of Local Energy Companies) – COGEN Europe – European Biogas Association – European Heating Industry – Eurogas – GCP Europe (efficient building engineering services) – GD4S – Gas Infrastructure Europe – Hydrogen Europe – Liquid Gas Europe

Subject: Renewable and decarbonised gases, sector coupling, innovative heating technologies to decarbonise buildings

Dear Executive Vice-President Timmermans,

Please find enclosed a letter on behalf of ten industrial associations operating in the energy supply, transmission, distribution, heating technology manufacturing and building engineering professions.

The subject of the letter is: *“Renewable and decarbonised gases, sector*

coupling, and innovative heating technologies - key enablers for a fast, safe and affordable decarbonisation of buildings", and it is intended to give input to the Smart Sector Integration, Renovation Wave and Hydrogen strategies of the European Commission.

We thank you in advance for your attention. We remain available for any clarification and follow up.

With kind regards,

[Redacted]
