Subject: European Heating Industry's (EHI) new report "Rolling out heat pumps: barriers and how to overcome them"

Dear Mr Maggi,

In the context of the current discussions on the "Fit for 55" package, I thought that you would be interested in our new report "Rolling out heat pumps: barriers and how to overcome them". Heating heat pumps will play an important role to achieve **climate neutrality of buildings** by 2050. As our heating industry forecasts the sale of 1 million hydronic heat pumps this year, a historical high, we have identified the barriers that still need to be overcome to bring this technology to the mass market in Europe.

Such barriers are related to the energy value chain, the market, legislation and technology. As market leaders in the sale of heat pumps in Europe, we highlight

prospective solutions and take the liberty of proposing policy recommendations to support the uptake of heat pumps in European homes.

I am at your disposal for a meeting in case you wished to discuss the findings of this report. In the meantime, I take this opportunity to wish you a happy Christmas period and a successful New Year.

With kind regards,

 | **Secretary General**
