

BTO report on meeting between [REDACTED] and Huawei - 19/11/2021

Huawei participants : [REDACTED]  
[REDACTED]

EC : [REDACTED]

In view of the upcoming launch of activities under the SNS partnership, HW representatives wanted to get clarification on the SNS preparation status. Following topics were addressed and clarified by EC representatives:

- Date of call opening and time duration to prepare for proposals. HW suggests at least 3 months to get good proposals;
- Flagship project and opening. HW suggest that the large scale project following up on current Hexa-X should be open enough to get views of important entities not participating in the project;
- TRL level of the various actions
- Global standardisation issues, where HW believe that Europe has a strong role to play to facilitate it.

Attached, slides presented by the company
