

Mr. F. Timmermans
Vice-President
European Commission
Rue de la Loi 200

1049 Brussels

Machelen, 31 May 2022

Dear Vice-President Timmermans,

I would like to congratulate you on the REPowerEU plan that the European Commission has been able to put together under your leadership over the past few months. At ExxonMobil, we are committed to supporting the European Union in ending its dependence on Russian energy imports as well as in decarbonizing its economy. [REDACTED] ExxonMobil, [REDACTED] will be visiting Brussels at the end of June and would like to request a meeting with you to discuss these important issues and how ExxonMobil can contribute.

In response to the Russian invasion of Ukraine, we immediately decided to discontinue our oil and gas production activities in Russia and make no new investments there. To help supply the needs of the Ukrainian agricultural sector and society at large, and with the much appreciated support of the Commission's DG Energy, we committed to bring large volumes of fuel to Ukraine. To help respond to the devastating humanitarian crisis, we have also donated about 10 million Euro to humanitarian relief organizations across Europe for medical care, emergency assistance, and refugee support.

We are acutely aware of the challenges the European Union faces as it works to reduce its dependence on Russian oil and gas and we believe ExxonMobil can support the EU in a number of ways. First, as one of the world's largest leaders in liquefied natural gas (LNG), we participate in the production of 87 million metric tons per year – accounting for more than one-fifth of global demand. Some of that LNG is already flowing into Europe, via import terminals in Italy, Belgium, and the United Kingdom. We are currently working with our partners around the world on opportunities to bring on incremental LNG supply (e.g. from the United States and Mozambique) as well as on expanding the European LNG terminal capacity. We are also progressing the development of new natural gas production offshore Cyprus.

A second way we intend to support the EU is with the rapid decarbonization of society. We have ambitious 2030 decarbonization plans for our European refineries and chemical plants which support the company's ambition to achieve net-zero scope 1 and 2 greenhouse gas emissions from operated assets by 2050. We are investing more than \$15 billion through 2027 on initiatives to lower greenhouse gas emissions. With its ambitious policies, Europe is well positioned to attract investments in hydrogen production, carbon capture and storage, low carbon liquid fuels, and advanced recycling of plastic

waste. The investments we are progressing, such as with Porthos in Rotterdam, can also help other hard-to-abate industries reduce their emissions.

As [REDACTED] of a large investor in the EU – having invested over 20 billion Euro since 2011 – [REDACTED] would appreciate an opportunity to discuss with you how we can help Europe strengthen its security of energy supply and reduce its CO2 emissions. [REDACTED] will be speaking at the GMF Brussels Forum on 27 June. If you plan to participate as well, perhaps a discussion in the margins of that meeting can be arranged. Alternatively, [REDACTED] could be available in Brussels on June 24 and 28 as well as potentially on June 23.

Thank you very much in advance for considering this request. I look forward to hearing from you.

Sincerely,

[REDACTED]

ExxonMobil Europe

ExxonMobil in Europe

European office hubs:	Brussels, Prague, Budapest
Technology Center:	Brussels
Number of Employees in EU:	13.300
Branded fuels service stations:	6.300

Capital Investment in Europe 2011-21: 23 billion USD

Oil & gas production and sales (2021 data)

Net liquids production (thousands of barrels per day)	22 kbd
Natural gas production (billion cubic meters/year)	8 bcm
Natural gas sales into EU (billion cubic meters/year)	24 bcm

Upstream Portfolio

Europe	Working interest (%)
Cyprus (Block 5, 10)	60
Germany (Onshore)	5-100
Greece (Offshore Crete)	40
Italy (Adriatic LNG Terminal)	71
