**Subject:** Siemens Energy: 15 concrete measures to operationalise RePowerEU

Dear Ms. Juhansone, dear [REDACTED], dear [REDACTED], dear Kurt,

As I haven't many most of you yet, please allow me to briefly introduce myself. My name is [REDACTED] and I am [REDACTED] Siemens Energy in Brussels.

As a globally leading and fully integrated energy technology company, we as Siemens Energy would like to **contribute to the ongoing discussions on operationalizing the REPowerEU Communication from 8 March.**

Together with colleagues from all business segments, we have developed a **concise 15 point plan focusing on very specific and near-term measures to reduce the dependence on energy imports from Russia while succeeding with the energy transition.** Many of the measures could be implemented right now within the context of ongoing Fit-for-55 negotiations.

Our objective is not to make the "mountain" of this energy challenge bigger, but to highlight specific elements that allow us to start climbing and **to resolve some of the key bottlenecks for a carbon-neutral, affordable and secure energy system.**

I hope that our proposals provide helpful input for the discussions and we are happy to further discuss them bilaterally at any time of your convenience.

Kind regards,

[REDACTED]
