### Flash Report – Meeting with RESPOL

Present:

- Respol: [REDACTED]
- MOVE [REDACTED]

Summary: RESPOL presented an overview of the company and its decarbonisation goals. Respol global company with 24.000 employees active in more than 20 countries. It operates a network of 4.600 refuelling stations and 500 charging points. Respol aim to expand in to hydrogen refuelling business models in steps:

- By 2025 to deploy an electrolyser in own refineries and participate in pilots
- By 2030 to supply 2 GW of hydrogen capacity and deploy e-fuels production facility.

Respol aim to mobilize 611 mio EURO by 2025, with 230 mio being used for the deployment of electrolyzers in Petronor.

[REDACTED]

During the discussion MOVE updated on the progress in the ARIF negotiations and on the state in preparations for the upcoming RLCF Alliance.

**Subject:** FW: REPSOL: Meeting request - Hydrogen Ambition 2030

Good morning [REDACTED],  
Please see below the invitation – ok for you to join [REDACTED] for the meeting?  
Thank you

**Subject: REPSOL: Meeting request - Hydrogen Ambition 2030**

Dear Mr. [REDACTED],

I'm writing to you in your capacity as [REDACTED]  
[REDACTED] inside DG MOVE.

As [REDACTED] [REDACTED] at Repsol, I would like to make ourselves available to share with you Repsol's Hydrogen Strategic Ambition for 2030. I would appreciate the opportunity to set up a meeting with you, at your convenience, to discuss this matter together with [REDACTED] at Repsol. Please let us know which is the most suitable date for you.

Repsol is firmly committed to lead the development of the Hydrogen vector in the Iberian Peninsula, being present in the entire value chain of Hydrogen, from production to demand. Repsol plans to take a relevant participation in the main Hydrogen valleys – clusters of production and local consumption - of Spain and plans to invest 2,549 million euros in multiple projects that would allow the installation of a Hydrogen production capacity of 1.9 GW until 2030. We have created the Shyne consortium in order to channel our efforts and those of other 32 entities to impulse all kind of production technologies and usages of renewable hydrogen.

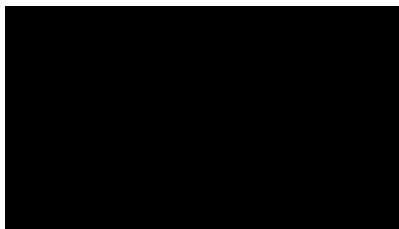

We believe that the current situation, makes it even more relevant to accelerate the early development of Hydrogen markets, that may turn into one of the native alternatives to the usage of imported gas.

Nevertheless, as in any other emerging sector, renewable Hydrogen is currently facing some challenges in its development. Some of them stem from regulation as a too stringent link of additional renewable capacities with hydrogen production (based on time and geographic criteria, that may endanger the feasibility of these projects), others are related with promoting the early demand or supporting emerging technologies.

Hoping that you find this proposal of interest, we look forward to hearing from you.

Kind regards,

[REDACTED]
