**Main issues discussed**

1. **Context of the meeting**

*First meeting requested by EPICO to present their ongoing work assessing market design options for the electricity and gas market*

2. **List of points discussed**

*EPICO, a think tank for sustainable, market-based and innovation-oriented climate and energy policy, presented the outline of the paper assessing mid- and long-term market design options. EPICO aim to publish end of November / early December. The paper will assess the following options: Iberian model, the Greek model, extending the current emergency measures and future-proofing the current market design including contracts for difference. The paper will also analyse the benefits of the merit order.*

*DG ENER welcomed the work presented by EPICO and asked to share a draft report once it is ready.*

3. **Conclusions/recommendations/opinions and next steps**

*EPICO will share a draft report assessing market design options end of November / early December 2023 and will continue exploring further the selected options.*

**Directorate or unit**
ENER.C

**Internal participants**
