Consultation of Regulatory Assistance Project on EMD [09.12.2022]

Participants

- Regulatory Assistance Project:
- DG ENER:

Main messages

- Produce guidance on energy communities to clarify definitions and network tariff design to push for time-differentiated network tariffs that can incentivise flexibility
- Removal of barriers for participation in balancing markets for energy communities (e.g. decrease min bid capacity)
- Foster cooperation between aggregators and energy communities
- Provide capacity building support to prosumers and energy communities to access to and operate on flexibility markets
- Prepare framework of affordability options that may limit the strike prices for consumers.
