

## Report meeting with renewable energy industry/"Alliance"

Present: DG TRADE, ICTSD, ABB, ALSTOM, EWEA, EPIA

Focus of discussion was on how TTIP could foster trade and investment in renewable energy with the industry (the 'Alliance' which also includes ICTSD). Industry made a link with Environmental Goods Agreement. By being an example, TTIP could have a(n) (big) impact on agreeing on non-tariff rules and energy services liberalisation in other negotiations too. ICTSD announced the publication of a paper dealing with the above mentioned issues. Paper will be published in September. We agreed with the industry on a follow up in September.
