Subject: Confirmation of proposed technical consultation meeting on GAINS modelling, November 5th 2012

Dear members of the SEG on Air Policy Review,
Having received several expressions of interest to participate to the technical consultation meeting as well as requests for further details, we come back to you to confirm that the meeting will be held at IIASA on the 5th of November between 09:30 and approximately 16:30 (see attached draft agenda).

In the agenda we have foreseen time slots of 20 minutes (15 minutes slide presentation plus 5 Q&A) for each organisation to present their views and main technical issues at stake. Slots in the draft agenda are reserved for those organisations that have already confirmed their intention to participate; any interested parties who have not yet confirmed their attendance please do so as soon as possible with a view to finalising the agenda by the 12th of October. Please note that for practical capacity reasons we kindly ask you to limit participation to 2 representatives per party.

After the plenary session, bilateral technical talks will be held between experts from organisations and from IIASA.

In order to make the most of the limited time available, please provide IIASA with a list of discussion points and possible data files two weeks in advance.

For all organisational, logistical and housekeeping issues, please contact _____ at IIASA.

Best regards,

European Commission

Subject: Proposed technical consultation meeting on GAINS modelling, November 5th 2012

Dear participants to the Stakeholder Expert Group (SEG) on Air Policy Review,
At the third SEG meeting, held in Brussels on 21st June this year, some representatives of industry associations enquired about the possibility to hold a technical consultation meeting with IIASA on the assumptions underpinning the development of the TSAP review scenarios.

Having consideration for time and resource constraints, it was agreed that a joint consultation session could be held with the key interested industry groups together in a coordinated manner.

We are now making contact to inform you that such technical consultation meeting is preliminarily scheduled for Monday, November 5th at IIASA, Vienna. This invitation is sent to the following stakeholder organisations, based on interest expressed and feedback provided after the SEG3 meeting:

ACEA
AECC
CONCAWE
COPA
ETRMA
EURELECTRIC
EUROFER
EUROMETAUX
EUROPIA
As well as EGTEI

The technical consultation meeting will focus on the techno-economic characterisation of various sectors and processes in the GAINS model.

The purpose of the meeting is to share information between the IIASA modelling team and key parties having interest in and access to specific data, and to improve the quality of techno-economic data in the model and more in general in the Air Policy Review.

Please note that for reasons of time efficiency and transparency to all stakeholders, in this meeting we will neither discuss general assumptions of broad interest such as on economic development, energy scenarios and environmental policies, nor the general Impact Assessment methodology, which are all issues of relevance for the Stakeholder Expert Group and other fora.

If interested to participate in this meeting, please let IIASA (in cc) and DG ENV know asap; in order to make the most of the limited time available, please provide IIASA with a list of discussion points and possible data files two weeks in advance.

Looking forward to meeting you in November

Policy Officer
