Dear Daniel,

Thank you for your reply to DG ENV's comments on the interservice consultation on the RDE test procedure. I was advised that meanwhile we received and scrutinized the final draft implementing act of Monday and could agree that it be put to vote next Tuesday 24 March. This is appreciated and it seems we now have a good basis to settle a first important step in addressing the RDE issue. We have also received the final version of the non-paper which sets out the intentions for the future and consider this also much improved.

Let's hope we can now gather the necessary majority and that the proposal is not further diluted following e.g. external pressure. We'll keep working on it from our side as well.

Regards et merci,

Karl
