Subject: LNG Terminal Krk

Meeting with Mr Natko Vlahovic
Wednesday, 9 Dec 2015, 12h15 – 12h30

Vlahovic Group (consultancy), Identification number in the register: 10102758435-95.

Mr Vlahovic also chairs the Croatia – EU Business Council, Identification number in the register: 793682712217-78.
He was a participant at the CESEC conference in Dubrovnik in July.

Vlahovic Group represents Cheniere Energy (mainly LNG-related businesses) and Wellford Energy (Investors), both with an interest in the LNG Terminal in Krk.
He highlighted his strong support for the project as such.

The message passed by Mr Vlahovic was mainly that there was in his view a need for more and faster progress of the project and for more information, transparency and feedback to the public or interested stakeholders.

He mentioned as examples a lack of clarity ref. the concept (bcm installed or bcm floating terminal), that the result of studies commissioned by the project developer and financed by the Commission were not known, a lack of consultation with NGOs and civil society, and a lack of information on the tenders for potential capacity booking and potential investors (which apparently led some interested stakeholders not to participate in the tender) and their results.

Christian Linder
Member of Cabinet
of the Vice-President in charge of Energy Union, Maroš Šefčovič
European Commission
