Good evening [REDACTED],

I have enclosed my authors copy of my new published and peer-reviewed paper **Glyphosate, pathways to modern diseases IV: cancer and related pathologies**. The publication appears in the September 30, 2015 issue of the *Journal of Biological Physics and Chemistry*. Physical copies were recently mailed to subscribers. The paper at the JBPC reference is in V 15 (3), September 30, 2015. I also sent a copy last week to Dr. Bernhard Url, (EFSA) in Italy.

The *new* Samsel and Seneff, and Seralini, papers have been posted online as "POAP-final". So they can be accessed by anyone via the "Articles posted online ahead of print" link on the main JBPC journal website, or directly from <http://www.colbas.org/jbpc/poap.htm>

You may also access my authors copy under my name at [researchgate.net](https://www.researchgate.net) and [Academia.edu](https://www.academia.edu) It is now being accessed by many countries around the globe.

Best regards,

[REDACTED]
