

Subject: Eurogas views on the Clean Energy Package - REDII, EED, EPBD

Dear Ms Colucci,

We are very appreciative of the immense work that you have invested in the Clean Energy for All Package. We have been working together with our members extensively over the past months to seek to ensure that this Package reaches its full potential. We are therefore attaching our collective views on some of the respective elements of the Package, as well as some suggested amendments.

We would be happy to continue our dialogue on these critical matters, and remain available respond to any questions or inquiry you may have, be it in person, or by any means.

Sincere regards,

Tim Cayford
