Subject: DIGITALEUROPE assessment of TPP provisions for TiSA
TTIP

Dear all,

DIGITALEUROPE is pleased to share with you its initial assessment of the Trans-Pacific Partnership chapters that are of interest for the digital economy including the scalability of the Digital Single Market on a global stage.

In this document, you will find some key recommendations for the EU's trade agreements, in particular for the TiSA negotiations on chapters such as e-Commerce, Telecommunications, Technical Barriers to Trade - ICT Annex, and IPR.

We hope European Institutions will seize this momentum for the global digital economy by promoting key offensive digital principles in the TiSA

We believe that only a comprehensive and proactive approach to digital trade disciplines in implementing the new Trade Strategy will establish the European

Union again as a frontrunner again in International Trade Policy and ensure competitive market access for European ICT Companies.

The priority issues for DIGITALEUROPE in pending and future trade agreements - also key for the digital transformation of the European industry -, are free cross-border data flows, prohibition on government forced localisation, and removal of non-tariff barriers in the ICT sector.

We wish you all the best for this New Trade year!

Diane Mievis (on behalf of DIGITALEUROPE)
