Subject: Visit of Total R&D Center in Feluy - 31 august

Participants:

- Total: The visit was organized by T. Kervyn – Deputy Director EU Public Affairs - Chemicals
- Commission: [REDACTED] (SG), [REDACTED] (GROW) and [REDACTED] (ENV)

Summary

Total invited a small delegation of officials to visit their R&D center in Feluy. The visit was meant to show concrete examples of how innovations could support the transition towards a more sustainable value-chain for plastics. In the margins of the visit, a few short presentations were given about Total's R&D activities, in particular on chemical recycling. Total's representatives stressed the importance of innovation to support higher recycling of plastics in the future.
