(Archived 2015) Agenda

Agenda (as of 03.11.2015)

The content of the various sessions may slightly change until the event. The agenda will also be updated with title and abstract of the expert presentations as soon as we have them.

Whenever changes occur, we will update this page accordingly.

> **Requisites**
> For the hands-on sessions please bring a full notebook (not a tablet) which you can connect to a public Wi-Fi. It is also possible to share a computer between two users in case you are attending the course with colleagues from your organisation

Wednesday, 04.11.2015

"(Working Title) Fight against corruption using software tools goPRS and goTrace", *United Nations Office on Drugs and Crime*

"Monitoring Social Media for Customs", *Customs National Office, The Netherlands*

"EMM OSINT Suite in Education", *Hogeschool Leiden, The Netherlands*

"(Working Title) Darknet, Blockchain and Bitcoin Cashout", *Dutch Tax Authority Belastingdienst FIOD/SOI, The Netherlands*

Session Descriptions

EMM Server Hands-on Sessions

Basic Topics

This track is aimed at participants who have *no previous experience* in using tools of the EMM platform.

This track contains a number of practical activities addressing the main concepts of the EMM platform. Participants will be guided through the NewsBrief website to browse the information already available.

Afterwards they will start from a new problem statement (case study) to conceive and define EMM categories using the Category Editor. The definitions will be applied to the EMM platform and the results will be analysed using the NewsDesk tool. A number of media monitoring products will be prepared including: reports/newsletters, SMS and EMAIL notifications.

Advanced Topics

This track is aimed at participants who have previous experience with EMM or attended a previous EMM user workshop.

The idea is that the participants will work on case studies and we will coach them along the way. Doing this we will demonstrate advanced concepts of the tool platform as requested by the participants.

For example we could cover the use of the EMM NewsDesk management console (workgroup managers):

- Managing workgroup resources.
  - Target audience: workgroup managers, users that are in charge of configuring and maintaining a NewsDesk workgroup (managing users accounts, adding/removing newsletters, etc.)
  - Topics: global workgroup settings, users management, newsletters management, feed directory definition, Category Editor access rights management, adding/removing address books.
- Creating workgroups (system administrators):
  - Target audience: System Administrators, users in charge of a NewsDesk site (multiple workgroups).
  - Topics: creating workgroups. Assigning system resources to workgroups.

EMM OSINT Suite Hands-on Sessions

The EMM OSINT Suite is a desktop tool kit to support online investigations using information from open sources. Please find a more detailed description here.

Data Acquisition

- Web Search
- Web Crawling
- File Import

Entity Extraction

- Name Variant Database
- Custom Entity Types

Entity Extraction Advanced

- Import Custom Name Variants
- Custome Entity Types based on Regular Exrpessions

Scripting Data Export & Reporting

- Export Data using Reports
- Export Files
