Dear [REDACTED],

As suggested, you could come to our office at 5 p.m to discuss with [REDACTED] and I your proposal for the creation of the "g mobility platform".

Later, we could discuss the new GHG values from the JEC report version 5.

Please send your personal data, as usual, to [REDACTED] for your access to our building.

Best regards,

[REDACTED]

Thank you very much [REDACTED], perfect to me

Aside we can discuss also about new numbers from JEC WtW version5

Please let me know if you prefer I come to your office

With kind regards

[REDACTED]

Oggetto: RE: Call

Dear [REDACTED],

We could have a phone call, if you agree, tomorrow at 5 p.m

[REDACTED] "Deputy Head of Unit Innovation & Research" will also take part in the phone call to discuss about the "g mobility platform" proposal.

Best regards,

[REDACTED]

Subject: Call

Dear [REDACTED]
would you be available for a call during these days ?

Apart for having a feedback on last week meeting with Mrs Bakran, I would like to discuss with you about WtW considerations on the LNG BC data as I just got the new dataset from Version5 of the JEC WtW report.

Despite the data of Version 4 they contain also the bioLNG pathways and they are globally much more in favour of LNG as also Petrol and Diesel data have been recalculated and now they are higher

I am available at office or on my mobile phone whenever you want
Thank you very much!
