**Subject:** Shell announces methane emissions intensity target for oil and gas assets

Dear ,

I'd like to inform you that today Shell announced a methane emissions intensity target for oil and gas assets. The target will maintain methane emissions intensity below 0.2% by 2025, and covers all oil and gas assets for which Shell is the operator. More information can be found on Shell's website [here](#).

We'd appreciate the opportunity to explain this announcement in more detail, as well as other initiatives we are involved with to reduced

methane emissions such as the [Methane Guiding Principles](#) and the World Bank Initiative.

I look forward to hearing from you,

Kind regards,
