**Subject:** Report of the meeting with Siemens, 29 January 2018

FYI

We [Art. 4.1.b] [redacted] and myself) met Siemens conglomerate's as well as Siemens Healthineers representatives [Art. 4.1.b] [redacted], respectively).

Under its energy portfolio, Siemens has 3 factories on the ground in Indonesia. On the other hand, in the area of transport Siemens is not localised [Art. 4.1.a] [redacted]. In particular, Siemens highlighted the importance of government procurement, both in terms of transparency and GPA-style access, mainly for its energy divisions (gas turbine, wind). In this regard Indonesia is potentially a big growing market for Siemens.

Siemens drew our attention to the following issues faced in their trade and investment relations with Indonesia and they expect us to raise them during the negotiating process. They committed to providing us with the recent legislation referring to specific barriers they are facing.
