Topic: IOGP recommendations to draft NECPs and the role of CCS

**Dear Vice President Maroš Šefčovič,**

**Dear Commissioner Miguel Arias Cañete,**

The ongoing review of the draft National Energy and Climate Plans (NECPs) offers an excellent opportunity to outline readily available solutions to reduce EU emissions now, and to further recognise and facilitate the deployment of Carbon Capture and Storage (CCS) and low-carbon hydrogen.

In this context, IOGP would like to share recommendations from the oil and gas industry.

Please find attached:

- IOGP letter on draft NECPs and the role of CCS
- ANNEX 1: Recommendations on the role of CCS in draft NECPs

With our recommendations, NECPs would better take stock of recent developments and highlight the increasingly important role CCS has in delivering on EU energy and climate objectives. We hope you and your colleagues consider our points while finalising your recommendations to Member States.

Should you have any questions please do not hesitate to contact us.

Yours sincerely,
