**Subject:** TR: EU Battery Alliance - Follow-up to 11/10 letter

Dear [redacted], DG GROW, [redacted] Automotive Sector  
Dear Mr. Manuel SZAPIRO, Cabinet of the Vice President of the European Commission,

We are coming back to you in the context of the strategic initiative of the European Commission for the launch of an EU Battery Alliance.

As introduced in our email of October 6<sup>th</sup> to Mr. Maros SEFCOVIC, Vice President of the European Commission, our company E4V, (*"Energy for Vehicles"*) has been working for the last nine years in this very sector of the new Lithium Ion Batteries and the Electromobility.

We work as Innovative Partner with many companies, and have already more than 12.000 vehicles *Powered by E4V®* on the road.

Our technology is very safe and has a long cycle life, which makes it ecofriendly and very appropriate for all professional applications.

As mentioned we would be eager to contribute in this field.

Incidentally we are also committed as van manufacturer through our COLIBUS activity [www.colibus.eu](http://www.colibus.eu)

We would be very interested to contribute to the EU Battery Alliance Initiative and propose our technology among the potential ones for relocation of this strategic industry in Europe. Thanks for keeping us in the loop of the coming working groups. I will follow personally the issue and would be pleased to start with any conference call at your best convenience.

Waiting for this opportunity

Best Regards
