Subject: Re: EU Battery Alliance - Follow-up to 11/10 letter

Dear Madam,
Dear Sir.

We very much look forward to being part of your initiative promoting Battery Development and production in Europe, having worked on the Horizon 2020 EVERLASTING Study (everlasting-project.eu) since 2016. We are responsible for the Battery Management System (BMS) part of this study, an integral part of the Battery where we have developed a technological leadership in over the past 10 years.

We would like to engage with you on that topic as well as discuss our innovative battery pack production process we are currently finalising.

[REDACTED] interests of a natural or legal person

We do look forward to being part of this extremely important initiative, please let us know how to best proceed from here.

Best regards
