Subject: RE: EU Battery Alliance - Follow-up to 11/10 letter

Dear Mr SZAPIRO and [REDACTED],

I am writing in response to the letter from Mr ŠEFČOVIČ dated 31st October 2017 concerning “High Level Meeting on EU Battery Production – Follow Up”.

[REDACTED] I wish to confirm our interest to participate in the EU Battery Alliance and that, if selected to participate, I will represent the Company, supported by in-house specialists as needed.

Re: the role Phillips 66 Limited can play

As set out in my e-mail of 4th October to Mr ŠEFČOVIČ, Phillips 66 Limited the UK subsidiary of Phillips 66, already plays an important role in the electric vehicle battery supply chain. Specifically, high quality petroleum coke manufactured at our Humber Refinery on the east coast of the UK is used to make anodes for batteries. Phillips 66 Limited has been a refiner and manufacturer of high grade petroleum coke for over 45 years for the steel industry. Developments in battery applications have allowed us to supply the battery anode market (in China) for consumer electronics in computers and smartphones. These business relationships have expanded such that our petroleum coke is now used in the manufacture in China of battery anodes for electric vehicles on the roads today. Phillips 66 Limited is the only European manufacturer of this high quality grade of petroleum coke.

We would be very interested to discuss with you how Phillips 66 Limited can help support this important initiative. Specifically a) we can make small quantities of coke available for research projects if required and b) we are able to supply commercial quantities of petroleum coke to battery anode manufacturers wishing to establish a manufacturing operation in the European Union.

Yours sincerely,

[REDACTED]
[REDACTED] **Phillips 66 Limited**
