**Subject:** RE: European steel industry's position on the draft ETS State Aid Guidelines

Dear [REDACTED],

In addition to the position papers, which we have already sent, we want to share with you an additional document that we have elaborated in the meantime (attached). This document translates our proposal on the draft ETS State Aid Guidelines into concrete amendments, showing how our ideas could be concretely embedded in the draft.

Thank you for your support in organising the meeting,  
Kind regards

[REDACTED]
