

ESI Task Force meeting

04 May 2020 (h. 15-16)

Operational outcomes

1. Pending issues for the next Steering Committee:

- Diverging views emerged from the discussion on interoperability of national tracing apps in relation with internal border crossing and tourism. Therefore, under the agenda point on border issues, the Steering Committee will be asked whether the Task Force should look further into the issue of interoperability of tracing apps. In which case the involvement of CNECT would be necessary.
