Interoperability of tracing apps

- There is still uncertainty over the features and specific characteristics of the tracing apps developed by each single Member State and, as a consequence, over a possible concrete complementing intervention under the ESI to ensure their interoperability.
- In preparation to the discussion on this point at the next meeting of the Steering Committee, CNECT will further consult Member States to have a full overview of their needs in terms of current deployment, current and new features of the apps, and potential gaps where the ESI action could add value.
