Dear [REDACTED]

I hope you and your families are still all in good health.

Thanks again for sending us the draft decision. As agreed, you find our input and feedback on the draft in the attached file. We have included our text proposals in track changes with a further explanation under the relevant Articles.

In summary, the most important points are the following:

- In art. 4 we propose some specific text comments that bring the decision fully in line with the content of the letter from DG Sonnemá to DG Calleja of 14 February 2020.
- In art. 9 we propose several adjustments.
First, we do not see ground for the condition that manure may not be applied on grassland if the outside temperature is above 15 °C. We have checked at experts of Wageningen University, but found no scientific research indicating that such a condition would be beneficial for ammonia emissions. We do see important practical consequences of such a decision, most importantly a very significant limitation of the period in which manure can be applied, which brings an increased risk of nitrate leaching. Therefore, we propose to leave out this condition. Second, we propose some changes in the text to bring the decision in line with applicable national regulation, which is a.o. differentiated for types of soil. Third, we propose to take into account the exemption 'surface spreading of cattle slurry on grassland'. This is a relatively small, existing exemption that has its basis in the 5th and 6th Action Programme. Attached you can find a copy of this exemption (legal text, in Dutch).
- In art. 12 we propose some small textual adjustments.

I hope our comments and proposals are clear. Of course, we are available to answer any questions and/or further discuss any topics. If needed, we can plan a video conference should this help to keep the process up to speed.

Looking forward to your reply,

Best regards,

[REDACTED]

Onderwerp: Draft decision

Dear [REDACTED]

I hope you are all well as so are your families.

Thank you for the information on the measures taken by the Netherlands to reduce ammonia emission. This has been very useful in preparing the draft proposal.

As agreed during our phone consultation of 24 March, please find herewith our draft proposal for a new Decision. The draft is based on Decision (EU) 2018/820, to which in particular the following changes are proposed to be introduced:

- **Article 4.2(e),(f),(g),(h)** : additional provisions guaranteeing to the full implantation of the enhanced enforcement strategy based on the letter by Mrs Sonema
- **Article 4.3**: requirement as regards the revision of the strategy
- **Article 9**: new article, with conditions as regards reduction of ammonia emissions to reduce nutrient depositions also in water
- **Article 12(l)**: reporting of the results of the enhanced enforcement strategy

We will send you later some recitals that also that will need to be updated or changed taking into account the more recent developments and new requirements.

As agreed, the Netherlands will provide further input and feedback on the draft **by 20 April**.

I wish you all a very nice Easter break despite the circumstances. Keep safe.

All the best
