Dear [REDACTED],

Today, Netherlands Statistics (CBS) published their report on phosphate and nitrogen excretion by livestock in the 4th quarter of 2019, as well as the preliminary overall figures of 2019. Attached I am sending you the report of CBS.

With an excretion of 156 mln kg of phosphate (ceiling: 172.9 mln kg) and 490.3 mln kg of nitrogen (ceiling: 504.4 mln kg) both remain well below the ceiling and have further reduced compared to 2018. The excretion of each sector (dairy, pig, poultry, other) is below their sectoral ceilings as well. The Netherlands is therefore in compliance with the condition in the derogation decision and with the recently implemented law by which the ceilings have been incorporated in the Manure Act. In the table below you can find a brief summary of the most relevant figures.
