Subject: RE: Update recitals

Beste Wim,

Hierbij ontvang je de gevraagde update van de recitals ten behoeve van de beschikking.

I will continue in English.

With respect to the recitals we have some remarks to make or additional information to share:
4) RVO.nl has provided the information with respect to the amount of derogated farms and the agricultural area under derogated farms. The total agricultural area in 2019 is registered at Statistics Netherlands: <https://www.cbs.nl/nl-nl/cijfers/detail/80785ned>

8) The update is based on information from Statistics Netherlands:
<http://statline.cbs.nl/Statweb/publication/?DM=SLNL&PA=80780ned&D1=459,542,560,572-573&D2=0&D3=8-15&HDR=G1,G2&STB=T&VW=T>

9) The information on nitrogen use from livestock manure and the use of chemical N fertilizer is derived from the delivery from Statistics Netherlands to EUROSTAT in June 2019.
In 2018 it became clear there were some slight differences in definitions used in Eurostat and Statline. In 2018 it was concluded between the Commission and us to use the information which was sent by Statistics Netherlands to Eurostat for the update of this recital in the derogation decision in 2018. We suggest to treat this information the same way now.

11) RIVM has provided the relevant information. The data of water quality under derogated farms at loessial soils is still provisional for the year 2018.

12) The requested information cannot be updated at this point since the information originates from the Nitrates Directive Report for which the relevant data will be send to the European Commission at the latest at the end of June 2020. The presentation we gave in December 2019 in the Nitrates Committee was only focusing on derogated farms, and not on all farms. Therefore this information cannot be updated now.

Attached you find the underlying information with respect to recitals 8 and 9.

If you have any further questions, please do not hesitate to contact us.

Best regards,

Lyske
