Subject: Proposed follow-up briefing on Green Recovery of Ocean package
Date: mardi 2 juin 2020 18:54:58

Dear Helena and Carmen,

Following our recent separate discussions with each of you, myself, [REDACTED] of Seas at Risk and [REDACTED] of Oceana, would like to propose a joint briefing at an amenable time after 8th June with you and your relevant cabinet members, to provide a NGO briefing specifically on building back a better blue.

This briefing would briefly present our position on COVID emergency response measures, provide specific examples of projects that could be invested in for a Green Recovery of the Ocean, in support of the Blue Manifesto - a pathway to low-impact fisheries and healthy ocean ecosystems for the EU.

Please let us know if this is possible and propose a date that can work for you and your respective teams.

Very best,

[REDACTED]
