Subject: Programmatic document: female inclusion in post-emergency reconstruction
Attachments: ENG_0_Fuori Quota.pdf; Lett_von der Leyen.pdf

Dear President von der Leyen,

the pandemic has generated a dramatic impact on our personal and emotional lives, exposing women to the crisis in a more acute way than men, being in a position of greater occupational weakness.

Fuori Quota Association has prepared and would be pleased to bring to your attention a programmatic document, taking into account the lockdown impact and proposing priorities for reconstruction.

Please find attached the full text with clear guidelines for intervention – which is the result of the involvement of women at the top of companies and institutions - and a personal letter aiming specific attention to the particular condition of women.

We remain at your disposal for any further information, willing to open a constructive discussion to rethink the European society after the coronavirus emergency.

Best regards,

Maurizia Iachino & Alessia Mosca
