[EUBA Statement on Revised draft Delegated Act on climate-related objectives.pdf](#)

Dear Commissioner Breton,

We are writing to you in view of the upcoming publication of the Delegated Act on climate-related objectives under the Taxonomy Regulation, on behalf of the European Bioeconomy Alliance (EUBA)*.

The bioeconomy offers huge potential for tackling societal challenges such as resource efficiency and climate change by enhancing European sustainability and value creation. It plays an important role in boosting Europe's competitiveness by revitalising rural areas, thus providing growth and jobs over the coming decades.

The EUBA previously outlined concerns on the technical screening criteria in [a letter](#) sent in December 2020 as well as in our response to the public consultation. We received a reply from Commissioner McGuinness and Vice-President Timmermans in February 2021.

We take note of the revised draft Delegated Act on climate-related objectives that was presented to the Member States' Expert Group on Sustainable Finance on 24 March. While we recognise that the revised Delegated Act's Annex I has made improvements in certain activities, we consider that further modifications are still needed to fully enable EU bioeconomy supply chains and their outlets to contribute successfully towards climate change mitigation and adaptation and ultimately towards the EU's goal of climate neutrality, as outlined in further detail in our attached statement.

We are of course available for any further information that you might require, or to discuss in more detail.

Best regards,
