DIRECTORATE-GENERAL

CLIMATE ACTION

Directorate C - Climate Strategy, Governance and Emissions from non-trading sectors

CLIM.A.C.3 – Land use and Finance for Innovation

Brussels,

NOTE TO THE FILE

Subject: Meeting between Mauro Petriccione, [REDACTED]
[REDACTED] ExxonMobil

Participants:

ExxonMobil:

[REDACTED]

DG CLIMA

- Mauro Petriccione, Director General
- [REDACTED]

Discussion:

ExxonMobil outlined their actions to reduce the company's CO₂ emissions in line with the Paris Agreement. MP and ExxonMobil discussed the importance and respective merits of CCS, blue hydrogen and green hydrogen in decarbonising a number of sectors. Public support for these technologies was mentioned, together with the need for market support mechanisms such as carbon contract for difference for some of them.

MP and ExxonMobil further discussed low carbon fuels and their potential to help reach carbon neutrality. MP expressed the view that the desirable technological solution depended on the sector.
