Subject: Meeting request: Ørsted - RED III

Dear Mr. Grassi,

I hope you are doing well, and that you and your team are in good health.

As I am sure you can imagine, we are in [Ørsted](#) looking forward to seeing the proposals you and your colleagues in the European Commission will bring forward in the fit for 55 package this summer. We are not least following the preparations of the revised Renewable Energy Directive with great interest.

Being an investor in especially offshore wind energy and a developer of renewable hydrogen projects, the revised renewables directive will have direct impact on our business. As you may know, we also own and operate several combined heat and power plants in Denmark, which we have over the last decade converted from coal to biomass, thereby reducing the GHG impact of our electricity and heat production significantly.

Given the importance of the renewable energy directive, ***our VP and Head of Regulatory Affairs, Ulrik Stridbæk, would appreciate an opportunity to discuss how the directive can best support EUs long term energy and climate objectives.***

Among the topics we would like to discuss are:

- Facilitating long term build-out plans of renewable energy
- Future role of state aid and power purchase agreements (PPAs)
- Sustainability Criteria for biomass

We can propose the following time slots.

- Monday the 14th of June between 12:00 and 13:00
- Tuesday the 15th of June between 11:00 and 13:30
- Tuesday the 22nd of June between 13:00 and 15:00
- Friday the 25th of June between 11:30 and 12:30

I hope one of the slots above can work for you, and if not you are of course very welcome to propose an alternative date / time.

We look forward to hearing from you.

Best regards,
Jørgen Madsen
