

BTO: Regular coordination meetings with ENISA

Meeting 19.07.2021

Participants:

- DG CNECT
- DG JRC
- ENISA

Main points discussed:

- DG CNECT presented the state-of-play and future prospects of standardisation activities linked to the future AI Act. In this context it referred to the work done by IRC in mapping the existing standardisation to the requirements of the new AI Act.
- DG CNECT presented briefly the contents of the IRC report on AI standardisation ([JRC Publications Repository – AI Standardisation Landscape: state of play and link to the EC proposal for an AI regulatory framework \(europa.eu\)](#)).
- DG CNECT and ENISA agreed that, based on the IRC report and an evaluation of CNECT related to priority standardisation activities (for which closer monitoring at EU level would be necessary), they will identify in September the details for possible future cooperation.
