

ENER C3 – Meeting with Natural Gas World the *1st Annual European Gas Dialogues Conference*

11.03.2021

DG ENER C3: 

REPORT:

The European Gas Dialogues conference is designed to bring together the spectrum of stakeholders in the European natural gas community for the exchange and sharing of insight and viewpoints on how we can collectively move forward the position of the industry in local, national and global communities.

The event tackled a number of issues impacting the natural gas community:

- Supply competition in Europe's gas markets;
- Gas market integration: How liquid are Europe's hubs;
- Gas companies go green(er);
- Renewable gases: ambition vs realism;
- The role of gas in the EU's Green deal.

DG ENER took note of the issues raised and presented the current state of review of the Gas market legislation based on the Initial Impact Assessment published 10/02/2021.
