Subject: minutes meeting Cefic

Call with Cefic, 13 January 2021

Cefic explained that they support Green Deal, as energy intensive industry they feel responsibility. Cefic wants to play an active role in the green transformation but will need support to pull it all together as it's quite a package – essentially requiring to get circular, sustainable, decarbonized and digital all at the same time. Cefic members CEOs asked a number of questions concerning chemical strategy, green and competition, allowed types/degrees of cooperation (e.g. on data sharing, roundtable etc.), ETS, etc.

MV took interest in the issues raised and explained that only some of them are within her responsibility and on those she is willing to engage. On the situations where competition law may stand in the way of some industry cooperation, MV invited Cefic to come back with very specific examples of such cooperation and promised to put them in contact with DG COMP to discuss the matter with a view of providing guidance as necessary.
