*Dear Mr. Breton,*

it is our great pleasure to invite you to the event "Space to the Future: Sustainability. Competitiveness. Growth" an evening of culture and science to be hosted by Leonardo on **November 10<sup>th</sup> (6:30 pm)** at the **Bibliothèque Solvay**.

Specifically, we will observe that the Green Deal has set a high bar for the EU's commitment towards decarbonisation and environmental sustainability, with the aim of making the continent climate neutral by 2050.

In this regard, the space sector has emerged as a true European excellence and a formidable, versatile enabler to this transition, thanks to its multiple applications in fields as diverse as the monitoring of climate change, air quality and water pollution, but also smart agriculture and infrastructures' monitoring.

For the above, we would be extremely honoured if you could participate to the event delivering some introductory remarks as our guest of honour.

With our warmest regards.

---

**Mr. Thierry Breton**  
**European commissioner for Internal Market**
