

Info note

EDPB Plenary meeting, 12-13 March 2019

ITEM 3.3.1 - 13/03 - INFO NOTE - Confluence: collaboration & knowledge based IT tool

IT Users Expert Subgroup

I. Background

Coop SG made a request to the IT User SG in September 2018 for the implementation of a collaboration tool that allows to aggregate information to support their activities, to share legal knowledge, and to share information on national developments.

II. Current state of play

Following this request, the Secretariat presented and discussed the Collaboration tool Confluence with the IT Users Expert Subgroup on 17 January 2019. The Confluence is a Collaborative/Wiki Tool hosted by the EU Commission on Commission IT Infrastructure. This solution will provide the EDPB members with a secure and controlled way to aggregate, exchange and share information. The Supervisory Authorities will be able to log in via EU Login (same as for CIRCABC and AGM) and find information relating to the specific subgroups, access to a legal library of information including GDPR analysis, related recitals and case law and other important relevant information applicable to the EDPB such as IMI resources, knowledge base articles and IT resources. The solution will also provide a repository for the placement of the EDPB internal documents.
