**Subject:** Arla doubles Co2 target for operations to meet 1.5°C

Dear Mauro,

It is with great pleasure that I can announce that Arla Foods has confirmed a major new science-based climate target for its operations: from 30 to 63 per cent of the emissions from production, logistics and energy usage by 2030, in order to meet the 1.5°C target outlined in the Paris Agreement. Given that this represents more than a doubling of our previous reduction goal, this is an ambitious target that resolutely demonstrates our commitment to combat climate change and which, crucially, has now been approved by the Science Based Targets initiative (SBTi).

Please find more details on Arla's latest commitment, including practical information on the pathway to delivering the 63 per cent reduction, in my letter attached to this e-mail.

I would be more than happy to discuss our target with you as well as Arla's wider decarbonization and sustainability plans in line with the EU's climate goals. Please do not hesitate to reach out to us if you have any questions.

I look forward to hearing from you.

Med venlig hilsen / Best regards
