Present: [redacted] (Huawei), [redacted]  
[redacted] (CNECT)

personal  
data

- [redacted] CNECT took note of the information.
- *Assessment of the impact of the 5G security recommendation. CNECT clarified that the Commission would do this assessment; its nature and timing are not yet decided but likely to be a general descriptive report about the status of implementation of the overall Recommendation process and toolbox, possibly issued together with the cyber strategy in December.*
- *Technical vs non-technical measures.* [redacted]  
[redacted]  
[redacted] CNECT recalled that the toolbox is an ensemble including technical and non-technical considerations. [redacted]

. CNECT recalled that the NIS CG drives the Recommendation process/ toolbox, based on MS consensus, and Commission (CNECT) role is to facilitate its implementation in close coordination with MS, respecting national competences on security. DIGIT and CERT-EU have no responsibility with regard to the Recommendation and Toolbox but look after the security of EU institutions and bodies. CNECT recalled Huawei participation in H2020 projects.
