Hi,

I would check these calculations with [redacted] or [redacted] at DG ENER, but they are slightly terrifying if accurate given the loopholes in the current drafts of the DAs.

Speak soon.

Best,
Best,

Dear ,

It would be good to have too. How about today at 16h00, or Friday at 14h00?

Best,

Dear ,

Thank you for reaching out. The DA’s are a subject of much discussion indeed. We’ll be happy to exchange insights.
I don’t know on what time line you would like to talk. Any chance you would be available tomorrow, Wednesday, afternoon? Or Friday afternoon (except 15-16:00)?

If you don’t mind and if we can make the agenda’s work, I’d like to invite our colleague
as well. She follows the gas package for us and has been involved more closely in DA discussions.

Best,

Subject: [External] Renewable hydrogen delegated acts

Dear [Redacted], Dear [Redacted],

[Redacted] put us in contact. Would you have ½ an hour to speak about the following draft delegated acts on renewable hydrogen?

The public consultation for these close on 17 June, and I would appreciate the opportunity to unpack what we think their impacts on markets could be. Grateful for any time you can spare!

Best,

[Redacted]
