Meeting with newly established European Blockchain Association Blockchain for Europe (https://blockchain4europe.eu/). 4 April, 2019

Creation of a European Blockhain Association – to get all actors from different Member States on board. The association would help blockchain users to discuss and address certain issues relating to technology, such as e.g. crypto assets, security tokens. The association would effectively represent their views to national and EU supervisors and regulators. EU – next steps on crypto assets –will analyse the existing regulation.
