Subject: Nestlé submission to EU Code of Conduct – 2021 Report
Attachments: EU Code of Conduct - Nestlé Reporting 2021.pdf

Dear Code of Conduct's Liaison Group and DG SANTE team,

Please find in attachment Nestlé's 2021 reporting to the EU Code of Conduct, aligned with our contribution submitted in July 2021 (link [here](#)).

Please take note that we have removed one of our commitments, related to the reduction of emissions per tonne per kilometer of transport goods, due to the fact that we are reframing our approach with regard to this impact area. However, addressing emissions in transport remains an integral part of our Net Zero Roadmap and we will continue to address it as part of our actions.

It would be important to put for discussion, in one of our next meetings, how companies are expected to report on any evolutions of their commitments towards the EU Code of Conduct. We are willing to contribute to the upcoming discussions following this reporting round.

I remain available in case of any questions.

Kind regards,

[REDACTED]
