Subject: Report Village Analytics

Report Village Analytics
AV 15 09 22

Village Analytics (VA, [REDACTED]) requested a meeting (14 July) with cabinet to talk about using data innovatively in our work with the developing countries. INTPA's participant in the call was Mr [REDACTED].

VA presented the business case and asked about the possibilities to cooperate in enhancing the existing and new data to provide more impactful decisions and actions on the ground. They already work with the EIB, WB, ADB etc. INTPA explained how Commission and DG are going through huge learning process in the usage of data. They promised to discuss internally and see, if some kind of additional touch on base should be considered.
