Subject: Welcome letter & meeting request: Green Deal & sustainable raw materials supply
Attachments: Welcome Letter - Frans Timmermans - Metals Industry + Green Deal .pdf

To: Mr Frans Timmermans, Executive Vice President

Copy: Mr Diederik Samsom, Ms Sarah Nelen, Mr Daniel Calleja, Mr Ditte Juul-Jørgensen, Mr Mauro Petriccione

Dear Executive Vice President Frans Timmermans,

Please find attached a letter sent on behalf of Europe's collective non-ferrous metals industry, representing the full European raw materials value chain for supplying strategic metals to the climate transition.

We write to wholeheartedly congratulate you on your appointment as Executive Vice President for the Green Deal, and to request a meeting with a delegation of CEOs/Board members from best-in-class European metals companies. We would like to discuss how Europe can establish sustainable raw materials leadership to supply the technologies required for your Green Deal and climate-neutrality (e.g. batteries, clean mobility, renewable energy technologies, zero-energy buildings).

Your climate, circular economy and zero-pollution agendas will all have an important role to play.

A first indicative list of participating companies in this delegation includes:

- Boliden (Integrated mining and metals company, including production/recycling of zinc, nickel, copper, lead & gold)
- Hydro (Europe's largest aluminium company, and the only 360° company in the global aluminium industry,)
- Aurubis (The world's largest copper recycler, and leading multi-metals producer)
- Umicore (Recycler of over 20 metals and world leader in clean mobility materials)

We would appreciate if your office could provide 1-3 potential dates/times for

holding this meeting, and we will work with these companies (and potentially others) to make one work. One first indication we can provide is that Eurometaux's President, [REDACTED] Boliden will already be in Brussels on 22nd January and could lead a delegation on that date – but we are entirely flexible according to your schedule.

Best Regards,

[REDACTED]

On behalf of Eurometaux and the metals organisations European Aluminium, Cobalt Institute, European Copper Institute, Nickel Institute, International Lead Association, International Zinc Association, and European Precious Metals Federation – plus the European companies they represent and other member associations.
