Dear [REDACTED]

Thank you for your e-mail and request for a meeting with Ms Helena Braun. We would be pleased to propose you a slot for a video-call on 6 September at 11:00. Regrettably, an earlier slot would not be possible due to heavy agenda constraints. Would it be that slot also suitable on your side? If not, please kindly feel free to propose some suitable for you options.

Thank you kindly in advance.

Best regards,

[REDACTED]

[REDACTED]
Executive Vice-President Frans Timmermans

Subject: Fwd: Circular Economy Meeting on Metals and Clean Energy

Dear Helena,

I'm just following-up on the below email, to check your availability for a follow-up meeting where we can share the outcomes from our KU Leuven Metals for Clean Energy Study (attached), focussed on your circular economy and chemicals

priorities + answering questions you have.

We can also make the link with ongoing files relevant to raw materials (i.e. waste legislation, discussions on classifying the lithium compounds in batteries, the REACH review)

This had been suggested when we talked with [REDACTED] and your colleagues last week. Please let us know if/when you'd be available for such a discussion.

Best,

[REDACTED]

Subject: Circular Economy Meeting on Metals and Clean Energy

Dear Helena,

Following our meeting with [REDACTED] and colleagues on Wednesday, we would be pleased to meet you separately to present in more detail on the Circular Economy conclusions from KU Leuven's *Metals for Clean Energy* study, as well as the links with EU chemicals legislation (this was suggested during the meeting). Please let us know if you have any available slots in the next weeks for a meeting (either in-person or digitally).

Best,

[REDACTED]

Subject: Follow-up: Meeting on Metals and Clean Energy

Dear Antoine, Aleksandra, Stefanie,

Thanks again for yesterday's rich discussion on KU Leuven's Metals for Clean Energy report.

As discussed, we will follow-up separately with Helena to set-up a dedicated meeting focused on the circular economy and chemicals aspects of the report.

I attach again yesterday's slides and the policymaker summary of [REDACTED] full report. Please also find attached a data-backed answer to one of your questions in the meeting about whether there will be a continued long-term market for EU-mined metals in addition to fast growing recycled supply after 2040. This includes some deeper analysis from KU Leuven's study to answer that question more precisely.

In case of any further questions on this subject, please don't hesitate to get in touch with us.

Best,

[REDACTED]
